<b>Document Version:</b>	1.0
<b>Release date:</b>	February 26 <sup>th</sup> 2021

### Reasons and Description of the Product Discontinuation

The supplier of the imaging sensors build into the affected IDS cameras, ON Semiconductor, has discontinued with immediate effect the imaging sensors **MT9V032C12STM** (monochrome) and **MT9V032C12STC** (colour). Therefore IDS has to announce the discontinuation of the cameras models listed below.

IDS has secured a larger quantity of sensors timely, however, further purchasing is not possible as ON Semiconductor has already stopped the production of the sensors.

Due to this forced discontinuation the respective cameras can only be sold while stock last. Incoming customer orders are executed in chronological order, first-come, first-serve. Potentially not all orders can be served up to the End of Sale date mentioned below.

### Recommended action for customers

IDS recommends its customers to check demands and place orders as early as possible as stocks are cleared in chronological order. We are also able to recommend alternative replacement models. For any question regarding last time orders or successor models, please contact our sales team.
